

Introduction

version 0.0.3  CI passing  gh pages  docs passing

Welcome to this laboratory protocols repository, featuring standardized protocols for molecular biology and biophysical experiments.

The protocols are organized by category for easy navigation.

TODO

- [fix](#) tags
- [fix](#) amend template
- [fix](#) correct titration
- test cz std config
- add the version rtd-gh in nav
- restore build –strict

Available Protocols

- **Titration**: To perform biosensor calibration in Hek293 cells.

How to Contribute

To contribute to this repository, please follow these steps:

1. Clone the repository to your local machine.
2. Create a new branch for your changes.
3. Make your changes and commit them.
4. Push your changes and create a pull request.

If you need to create a new protocol, you can use the following sample:

- [Protocol sample](#)

Thank you for contributing!
