

# Introduction

docs **passing**

gh **pages**

CI **passing**

version 0.0.4

Welcome to this laboratory protocols repository, featuring standardized protocols for molecular biology and biophysical experiments.

The protocols are organized by category for easy navigation.

## TODO

- `tags`
- `correct titration`
- add the version rtd-gh in nav
- restore build `–strict`

## Available Protocols

- **Titration**: To perform biosensor calibration in Hek293 cells.

## How to Contribute

To contribute to this repository, please follow these steps:

1. Clone the repository to your local machine.
2. Create a new branch for your changes.
3. Make your changes and commit them.
4. Push your changes and create a pull request.

If you need to create a new protocol, you can use the following sample:

- **Protocol sample**

Thank you for contributing!
