

Laboratory protocols

Welcome to the Lab Protocols repository. Below is an overview of all available protocols. Click on the links to access each protocol document.

Welcome to the Lab Protocols Documentation

This repository contains a collection of standardized laboratory protocols for various molecular biology and biophysical experiments. The protocols are organized into different categories and can be easily accessed via the navigation menu.

Available Protocols

- [Titration](#): To perform biosensor calibration in Hek293 cells.

Templates

If you need to create a new protocol, you can use the following sample:

- [Protocol sample](#)

How to Contribute

To contribute to this repository, please follow these steps:

1. Clone the repository to your local machine.
2. Create a new branch for your changes.
3. Make your changes and commit them.
4. Push your changes and create a pull request.

Thank you for contributing!

Why this documentation?

Reproducibility and transparency to:

1. Facilitate consistent execution of experiments across team members and collaborators.
2. Allow continuous improvement and version control of protocols.
