

Introduction

docs **passing** gh **pages** CI **passing** version 0.2.1

Welcome to this laboratory protocols repository, featuring standardized protocols for molecular biology and biophysical experiments.

The protocols are organized by category for easy navigation.

TODO

- ☐ add version to exported pdfs
- ☐ add the version rtd-gh in nav
- ☐ restore build --strict

Available Protocols

- **Calibration**: To perform biosensor calibration in Hek293 cells.

How to Contribute

To contribute to this repository, please follow these steps:

1. Clone the repository to your local machine.
2. Create a new branch for your changes.
3. Make your changes and commit them.
4. Push your changes and create a pull request.

If you need to create a new protocol, you can use the following sample:

- [Protocol sample](#)

Thank you for contributing!

Why this documentation?

Reproducibility and transparency to:

1. Facilitate consistent execution of experiments across team members and collaborators.
